Slides for Occupational Letters Model

Test No. 1, SF-1 — Binocularity Both Eyes
To determine whether both eyes are being used together.

Test No. 2, SAB-2, Acuity* Both Eyes
This test uses letters for visual acuity testing.

Test No. 3, SAR-2, Acuity* Right Eye
Same as the Both Eyes test except letters are omitted from the left eye. Letters are different from the Both Eyes and Left Eye test.

Test No. 4, SAL-2, Acuity* Left Eye
Same as the Both Eyes test except letters are omitted from the right eye. Letters are different from the Both Eyes and Right Eye test.

Test No. 5, SSD-1 — Stereo Depth
Is a precise measure of one of the important factors of depth perception. The reliability of test results is high. It provides an excellent measure of binocular skill. Easily administered.

Test No. 6, SCD-1 — Color Perception
Consists of six accurately and authentically reproduced Ishihara Pseudo-Isochromatic plates. Detects color deficiency, but does not classify.

Test No. 7, SVP-1 — Vertical Phoria
Measures vertical balance between the two eyes. Good vertical alignment is an important factor in comfortable, efficient, two-eyed vision and is related to efficiency in most occupations.

Test No. 8, SLP-1 — Lateral Phoria
Desirable Phoria scores are associated with quick, accurate eye fixations and precise, effortless seeing.

Improvements have been made to test slides to enhance viewing performance. *Patented technology.
